

EXTI15\_10\_IRQHandler

EXTI9\_5\_IRQHandler

EXTI\_u8ReadPendFlag

```
graph LR; EXTI15_10_IRQHandler --> EXTI_u8ReadPendFlag; EXTI9_5_IRQHandler --> EXTI_u8ReadPendFlag;
```

The diagram illustrates a hardware logic flow. On the left, two rectangular boxes represent interrupt request handlers: 'EXTI15\_10\_IRQHandler' (top) and 'EXTI9\_5\_IRQHandler' (bottom). Blue arrows point from the right side of each handler box to a single gray rectangular box on the right labeled 'EXTI\_u8ReadPendFlag'. This indicates that both handlers contribute to setting or updating the read pending flag.
